

Regulated organizations like those in the life sciences, medical devices, and pharmaceuticals are required to show that employees are properly trained for specific jobs. Enter the LMS. The LMS is the perfect tool for tracking the most important training information.

- ◆ Electronic Signatures
- ◆ Electronic Storage of Training Records
- ◆ Audit Trail of Training Records Created or Updated

COMPLETE TESTING. SAVE TIME. GET BETTER RESULTS.

SOLUTION

rapidLD has developed a structured system compliance testing process and toolkit called rapidValidate. The product contains all of the tools and templates that an organization will need to complete the validation process.

- ◆ Validation Plan
- ◆ User Requirements Specification
- ◆ Functional Requirements Specification
- ◆ Decision Configuration Specification
- ◆ Traceability Matrix
- ◆ Data Conversion / Migration Plan
- ◆ Data Conversion / Migration Report
- ◆ Installation Qualification
- ◆ Operation Qualification
- ◆ Performance Qualification
- ◆ Validation Summary Report

Of course, these tool and templates are supported by rapidLD's team of world class professional services professionals to guide you through their use at your organization.

KEY BENEFITS

- ◆ Faster Test Plan Development
- ◆ Leverage Existing Testing Process Documents
- ◆ More Complete and Through Testing
- ◆ Improved Speed to Value
- ◆ Complete a system validation in a shorter timeframe and at less cost
